

I strongly object to the request by interstates banks doing business in Indiana to be allowed to circumvent the indiana state law "Do not call" list. We do not want to be called by these banks or any other vendors. The banks clearly recognize this yet they seek a way to circumvent our personal wishes and the law of Indiana. This is wrong. Do not allow them to violate our wishes and violate our privacy because of their more aggressive lawyers, legal power and finances. I personally suspect that the banks see a long range gain--if personal accounts are approved to replace Social Security, this would allow banks to barrage us, especially seniors with high pressure sales. Wrong. Wrong.
